

Dialysis Fee Schedule

Effective July 1, 2005, the fee schedule for outpatient dialysis services are as listed below. These services continue to be reimbursed via revenue codes based on Medicare's composite rate methodology. PEIA composite rate apply to all forms of outpatient dialysis and hemofiltration services provided by hospital-based and independent ESRD facilities, as well as services provided to home dialysis patients. Under the composite rate methodology, the member's ESRD facility must furnish all of the necessary services, equipment and supplies.

PEIA continues to follow Medicare's policies for ESRD items and services included in the composite rate, such as lab services, drugs and all home dialysis support services, equipment and supplies. Any such item and/or service billed separately will be bundled in the composite reimbursement allowance for the dialysis treatment.

Outpatient dialysis services should be billed on a UB92 claim form using one of the following Revenue Codes. A CPT code is not required with these Revenue codes.

Revenue Code	Revenue Code Description	PEIA Composite Rate
821	Hemodialysis/Composite Rate	\$151.50/treatment
831	Peritoneal/Composite Rate	\$65.00/day
841	CAPD/Composite Rate	\$65.00/day
851	CCPD/Composite Rate	\$65.00/day
