

West Virginia Retiree Health Benefit Trust Fund

GASB Statements No. 74 and 75, Accounting and
Financial Reporting for Postemployment Benefits
Other Than Pensions

Actuarial Valuation as of June 30, 2021
Measured as of June 30, 2022, and Applicable to the
Plan's Fiscal Year End June 30, 2022 and
Plan Sponsor's Fiscal Year End June 30, 2023

October 11, 2022

Mr. Jason A. Haught
Chief Financial Officer
West Virginia Public Employees Insurance Agency
601 57th Street, SE, Suite 2
Charleston, West Virginia 25304

Subject: GASB Statements No. 74 and 75 Actuarial Valuation as of June 30, 2021, for WV-RHBT

Submitted in this report are the results of the actuarial valuation of the liabilities associated with the employer financed postemployment benefits provided through the West Virginia Retiree Health Benefit Trust Fund (WV-RHBT). This program provides postretirement healthcare benefits to eligible retired members receiving pension benefits under the following retirement systems (“Retirement Systems”) as administered by the West Virginia Consolidated Public Retirement Board (CPRB):

- Public Employees’ Retirement System (PERS);
- Teachers’ Retirement System (TRS);
- Teachers’ Defined Contribution Retirement System (TDCRS);
- Great West (Plan G);
- West Virginia Death, Disability, and Retirement Fund (Troopers Plan A);
- West Virginia State Police Retirement System (Troopers Plan B);
- Deputy Sheriffs’ Retirement System (DSRS);
- Emergency Medical Services Retirement System (EMSRS); and
- Judges’ Retirement System (JRS).

The program also provides benefits to certain eligible members receiving pension benefits under the Teachers’ Insurance and Annuity Association and College Retirement Equities Fund (TIAA-CREF).

This report was prepared at the request of WV-RHBT and is intended for use by WV-RHBT and those designated or approved by WV-RHBT. This report may be provided to other parties only in its entirety and only with the permission of WV-RHBT.

The actuarial valuation as of June 30, 2021, and measured as of June 30, 2022, was prepared for purposes of complying with the requirements of Governmental Accounting Standards Board (GASB) Statements No. 74 for the plan’s fiscal year end June 30, 2022, and No. 75 for the plan sponsor’s fiscal year June 30, 2023. The calculations reported herein have been made on a basis consistent with our understanding of these accounting standards. Determinations of the liability associated with the benefits described in this report for purposes other than satisfying the financial reporting requirements of the plan sponsor may produce significantly different results. The actuarial valuation was based upon:

- Census information as of June 30, 2021, provided by WV-RHBT, CPRB, and TIAA-CREF;
- Healthcare claims, premium, and enrollment data provided by WV-RHBT;

- Substantive plan information provided by WV-RHBT;
- Retirement eligibility conditions for each respective retirement system found in CPRB actuarial valuation reports;
- Actuarial assumptions recommended and adopted as a result of the Experience Study covering the period July 1, 2015, through June 30, 2020;
- Economic assumptions and other healthcare-related assumptions recommended by Gabriel, Roeder, Smith & Company and approved by the WV-RHBT including a discount rate of 6.65% and an ultimate trend rate assumption of 4.25%;
- Updated MAPD premium rates available as of June 1, 2022; and
- Entry age normal cost method and a 20-year closed level percent of pay amortization period as of June 30, 2017, with 16 years remaining as of June 30, 2021.

We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by WV-RHBT, CPRB, or TIAA-CREF. Authorization of the assumptions and methods applicable to this actuarial valuation was granted by WV-RHBT, and they are disclosed in the assumptions and methods section of this report.

The actuarial liabilities and actuarially determined contributions were developed in accordance with the requirements of GASB Statements No. 74 and 75, and are applicable only for financial reporting purposes. The unfunded actuarial accrued liability and actuarially determined contributions (ADC) disclosed in this report should not be used to assess the level of plan assets needed to settle the plan's benefit obligations.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic, healthcare, or demographic assumptions; changes in economic, healthcare, or demographic assumptions; and changes in plan provisions, or applicable law. Due to the limited scope of the actuary's assignment, the actuary did not perform an analysis of the potential range of such future measurements.

This report does not entirely reflect the recent and still developing impact of COVID-19, which is likely to influence healthcare claims experience, demographic experience, and economic expectations, at least in the short term. We will continue to monitor these developments and their impact on healthcare and retirement programs.

This report was prepared using our proprietary valuation model and related software which, in our professional judgment, has the capability to provide results that are consistent with the purposes of the valuation, and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

Mr. Jason A. Haught
West Virginia Public Employees Insurance Agency

The signing actuaries are independent of the plan sponsor.

To the best of our knowledge, the information contained in this report is accurate and fairly presents the actuarial position of WV-RHBT as of the actuarial valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes. Alex Rivera and Jeff Tebeau are Members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions herein.

Sincerely,

Alex Rivera, FSA, EA, MAAA, FCA
Senior Consultant

Jeff Tebeau, FSA, EA, MAAA, FCA
Consultant

SECTION A

EXECUTIVE SUMMARY

Executive Summary

WV-RHBT administers and provides medical and prescription drug benefits to certain retired members receiving pension benefits under the PERS, TRS, TDCRS, Plan G, Troopers Plan A, Troopers Plan B, DSRS, EMSRS, or JRS pension systems, as administered by the CPRB and TIAA-CREF. Healthcare benefits are administered by the West Virginia Public Employees Insurance Agency (PEIA). The key features of the postretirement healthcare benefit program include:

- The plan sponsor provides a capped pay-as-you-go subsidy on behalf of eligible retired members. The capped pay-as-you-go subsidy per member depends on a capped aggregate annual dollar amount and the expected costs of the program. Based on *WV-RHBT Quarterly Financial Report for Fiscal Years 2022 to 2026*, dated July 2022, the capped subsidy rate for plan year end June 30, 2021, was \$144.70 per member per month.
- As of June of 2021, the Humana MAPD not-to-exceed per member per month premium rates were decreased significantly from approximately \$148.62 for calendar year 2021 to \$64.57 for calendar year 2022. Not-to-exceed rates after 2022, were also decreased significantly to \$77.57 for CY 2023, \$87.57 for CY 2024 and \$97.57 for CY 2025. These changes are expected to reduce the capped subsidy rates. Based on additional information provided by WV-PEIA, the composite capped subsidy rates were reduced to \$115.46 for PY 2023, \$37.62 for PY 2024, \$55.18 for PY 2025, and \$71.98 for PY 2026. The composite capped subsidy rates reflect an aggregate PAYGO limit of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, \$30 million for PY 2025, and \$40 million for PY 2026.
- Based on Senate Bill 419: “For fiscal years beginning on and after July 1, 2016, an annual amount of \$30 million from annual collections of the tax imposed by this article shall be dedicated for payment of the unfunded liability of the West Virginia Retiree Health Benefit Trust Fund.” The \$30 million annual prefunding contribution is provided through fiscal year 2037, or if earlier, the year the employer’s benefit obligation is fully funded.
- WV-RHBT also administers a fully insured retiree life insurance program. We understand the retiree premium rates are self-supporting and the retiree pays 100% of the premium resulting in no plan sponsor subsidy.
- Retiree contributions are set each year by the WV-RHBT and approved by the WV-PEIA Finance Board. Retiree contributions are based on the experience of the plan including claim, premium, and investment performance. Increases to retiree contributions may reflect healthcare inflation, claim experience, and premium increases above the plan sponsor capped pay-as-you-go subsidy.
- Retiree contributions depend on date of hire and years of service at retirement. Members hired on or after July 1, 2010, pay retiree healthcare contributions with no sponsor provided implicit or explicit subsidy. Members hired before July 1, 2010, pay retiree healthcare contributions that are reduced by a sponsor subsidy which depends on the member’s years of service at retirement.
- The Sick and Annual Leave Program (SAL) allows members hired prior to July 1, 2001, to convert accrued sick leave and accrued annual leave balances at retirement into either retiree healthcare benefits or pension benefits. Members hired before July 1, 1988, may convert accrued sick or leave days into 100% of the required retiree healthcare contribution. Members hired from July 1, 1988, to June 30, 2001, may convert accrued sick or leave days into 50% of the required retiree healthcare contribution. The conversion rate is two days of unused sick and annual leave days per month for single healthcare coverage and three days of unused sick and annual leave days per month for family healthcare coverage.
- Full-time higher education faculty members hired before July 1, 2009, who are employed on an annual contract basis for a period other than 12 months, upon retirement may extend years of

Executive Summary

teaching service into 100% of the employer-paid healthcare insurance coverage. The conversion rate is 3.3 years of teaching service for one year of single healthcare coverage, and 5.0 years of teaching service for one year of family healthcare coverage.

- Under the Retired Employee Assistance Program, the Plan provides premium subsidies to certain retirees if their income falls below 250% of the federal poverty level.
- WV-RHBT has established a qualified trust which receives contributions, pays benefits, and invests contributions made in excess of annual expenditures. The market value of assets decreased from \$1,673.0 million as of June 30, 2021, to \$1,625.0 million as of June 30, 2022. Long-term pre-funding assets are invested with the West Virginia Investment Management Board (WVIMB). Based on the WVIMB 2021 Annual Report, the investment objective is to earn 7.50% per year net of investment expenses. The strategic asset allocation consists of 50% equity, 15% fixed income, 5% private credit and income, 10% private equity, 10% real estate and 10% hedge fund. Short-term assets used to pay current year benefits and expenses are invested with the West Virginia Board of Treasury Investment (WVBTI). Based on the amount of assets held in the BTI account and expected benefit payments, and solely for projection purposes, GRS has assumed that approximately six to nine months of benefits and expenses are held in reserve with the WVBTI. We also understand that, if needed, the plan sponsor may use assets held with the WVIMB to pay current benefits and expenses.
- GRS performed an Experience Review study which was first applied to the actuarial valuation as of June 30, 2021. We recommended that the inflation assumption be reduced from 2.75% to 2.25%. The long-term investment return assumption for assets invested with WVIMB was reduced from 7.50% to 7.00%. Similarly, the long-term investment return assumption for assets held with the WVBTI was reduced from 3.00% to 2.50%.

GRS performed an actuarial valuation of the retiree healthcare for purposes of financial reporting under the requirements of GASB Statements No. 74 and 75. The basis of the actuarial valuation is outlined below:

- The actuarial valuation was based on census, claims, premium data, capped per member per month subsidies, aggregated projected capped subsidies, and applicable accrued sick leave balances as of June 30, 2021, as provided by WV-RHBT and reported by CCA.
- The actuarial valuation as of June 30, 2021, reflects updates to the OPEB and demographic assumptions based on the Experience Study Review for the period from July 1, 2015, to June 30, 2020, which was first applied to the actuarial valuation as of June 30, 2020.
- The actuarial valuation as of June 30, 2021, reflects updates to the following assumptions which are generally reviewed at each measurement date:
 - Projected capped subsidies;
 - Per capita claim costs;
 - Healthcare trend rates;
 - Coverage and continuance;
 - Percentage eligible for tobacco-free premium discount; and
 - Retired employee assistance program participation.
- The census as of June 30, 2021, includes data for 19,446 waived annuitants who are receiving an annuity and are eligible to receive healthcare benefits but have waived healthcare coverage.

Executive Summary

- For purposes of the actuarial valuation as of June 30, 2021, we have assumed that 2.5% of all waived annuitants under the age of 75 will elect to participate in the retiree healthcare program as of the actuarial valuation date. As of June 30, 2021, there were 13,189 waived annuitants under age 75 who were included in the actuarial valuation data, and so approximately 330 waived annuitants were assumed to elect coverage as of June 30, 2021.
- The substantive healthcare plan provisions were found in WV-PEIA's Summary Plan Description and Shopper Guide used for enrollment for plan year end June 30, 2022.
- The retirement eligibility conditions were found in annual reports and actuarial valuation reports provided by CPRB.
- An expected long-term rate of return of 7.00% for long-term assets invested with WVIMB was based on WVIMB's investment policy, the long-term strategic asset allocation, and an inflation assumption of 2.25%.
- An expected short-term rate of return of 2.50% for assets invested with WVBTI was based on the general inflation assumption of 2.25% plus 25 basis points.
- In the future, short-term assets invested with WVBTI are assumed to be approximately equal to six months of self-insured claims, fully-insured premiums, and administrative expenses. The remaining assets are invested in the long-term WVIMB account.
- Assets in the WVIMB account are assumed to be used to pay benefits and expenses only after the program is fully funded.
- The discount rate assumption of 6.65%, used to develop the actuarial accrued liability and normal cost, was based on the average expected return on invested plan assets during the projection period.
- A discount rate of 6.65% was also used to measure the Total OPEB Liability as of June 30, 2021. The discount rate reflects projected earnings of a short-term account managed by the WV-BTI and a long-term account managed by the WVIMB. The discount rate does not consider a municipal bond rate index, since assets are projected to be available to pay benefits in all future years, and based on the actuarial valuation as of June 30, 2021, the program is projected to be fully funded by 2025. However, during plan year end June 30, 2022, plan assets experienced significant investment losses. It is expected that the full funding period may need to be extended by one to two years depending on investment performance after 2022.
- The aggregate capped subsidy was assumed to reflect an aggregate PAYGO limit of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, \$30 million for PY 2025, and \$40 million for PY 2026. Based on the actuarial valuation as of June 30, 2021, and before reflecting asset losses during plan year end June 30, 2022, the program was projected to be fully funded by 2025. Projected employer contributions were assumed to equal the sum of State appropriations, the fixed annual capped pay as you go employer contribution, and expected SAL employer contributions. After the program is fully funded, we assumed the plan sponsor would contribute any amounts needed to maintain at least 115% funded on present value of benefit basis.
- The percentage of program costs paid by the retired member was assumed to remain stable at about 35% to 38% of program costs.
- Please see Section E for a summary of the assumptions used for the projection. Please see Appendix A for additional details on projection results.
- GRS relied on information provided by WV-PEIA and Continuing Care Actuaries (CCA) to develop projected capped subsidy rates for plan years 2022 through 2026. Based on this information, the estimated composite capped subsidy rates are assumed to be \$144.70 for PY 2022, \$115.46 for PY 2023, \$37.62 for PY 2024, \$55.18 for PY 2025, and \$71.98 for PY 2026.

Executive Summary

- GRS relied on information provided by WV-PEIA relating to expected Board approved projected aggregate sponsor PAYGO contribution limits of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, \$30 million for PY 2025, and \$40 million for PY 2026.
- GRS relied on Humana's not-to-exceed MAPD premium rates for calendar years 2021 through 2025.
- GRS relied on the WVIMB 2021 Annual Report for information relating to the investment policy and long-term expected return on assets including: an assumed inflation rate of 2.75%, an assumed long-term rate of return 7.50% on invested assets, and an effective real return of 4.75%.

Executive Summary

The key actuarial valuation results measured as of June 30, 2021, and June 30, 2020, are summarized in the following table (\$ in thousands).

| WV-RHBT Actuarial Valuation (\$ in thousands) | | |
|--|----------------------|----------------------|
| | | |
| Actuarial Valuation as of | June 30, 2021 | June 30, 2020 |
| Measurement Date as of | June 30, 2021 | June 30, 2020 |
| | | |
| Actuarial Accrued Liability | \$ 1,709,527 | \$ 1,666,334 |
| Market Value of Assets | \$ 1,673,024 | \$ 1,224,642 |
| Unfunded Actuarial Accrued Liability (UAAL) | \$ 36,503 | \$ 441,692 |
| Funded Ratio | 97.86% | 73.49% |
| | | |
| Applicable for Plan Year End | June 30, 2022 | June 30, 2021 |
| Employer Normal Cost | \$ 18,846 | \$ 21,650 |
| Operating Expenses | \$ 3,009 | \$ 3,478 |
| Amortization of UAAL | \$ 2,925 | \$ 33,834 |
| Actuarially Determined Contribution | \$ 24,780 | \$ 58,962 |
| | | |
| Employer Contribution | \$ 6,859 | \$ 152,142 |
| Employer Pre-Fund Contribution | \$ 1,534 | \$ 30,000 |
| Total Employer Contribution | \$ 8,393 | \$ 182,142 |
| | | |
| Expected Claims, Expenses and Premium Margin | \$ 153,443 | \$ 218,218 |
| Expected Retiree Contributions | \$ 50,461 | \$ 67,027 |
| Expected Net Employer PAYGO, SAL, and REAP Costs | \$ 102,982 | \$ 151,191 |
| Percent of Total Claims and Expenses paid by Retired Members | 32.89% | 30.72% |
| | | |
| Year Program is Projected to be 100% Funded | 2022 | 2021 |

Executive Summary

Key observations and conclusions include:

- During the plan year end June 30, 2021, the actuarial accrued liability increased from \$1,666 million as of June 30, 2020, to \$1,709 million as of June 30, 2021. The key factors which caused the change in actuarial liability include:
 - Increase/(decrease) due to normal cost, benefit payments, and interest: \$ (23) million;
 - Increase/(decrease) due to demographic experience: \$ (33) million;
 - Increase/(decrease) due to change in assumptions: \$ (8) million;
 - Increase/(decrease) due to updated capped subsidy rates, per capita costs, trend rates, and methods: \$ 107 million; and
- As shown above, the change in capped subsidy rates, per capita costs, trend rates, and methods had the greatest impact on reducing the actuarial liability. The key reason is due to the change in methodology, which explicitly calculates the per capita costs, capped subsidy, and retiree premium share when developing the net employer and plan costs. In prior valuations, net employer and plan costs were based on the capped subsidy plus SAL and REAP premiums that were picked up by the employer. The method was changed due to the significant decrease in MAPD rates and improved funded ratio which is projected to significantly decrease the projected capped subsidy revenue in the future.
- As of June 30, 2021, the plan is funded at 98% and is projected to reach full funding in 2025. For this purpose, fully funded means the plan year that the funded ratio reached 115% on a present value of benefits basis. Appendix A shows the details of the projections. For purposes of the projections, we assumed a significant portion of investment income would be used to pay employer benefits and expenses only after the program is fully funded.
- In our projection model, we have assumed the percentage of total costs paid by the plan member would remain stable at about 35% to 38% of total plan costs. After the program is fully funded in 2025, we have assumed the sponsor would make additional contributions needed to maintain a funded ratio of at least 100%.

SECTION B

OVERVIEW

Overview

Overview

The following section presents the results of the actuarial valuation as of June 30, 2021, of the WV-RHBT Retiree Healthcare Benefit Program. The actuarial valuation reflects the liability for benefits paid by the plan sponsor, including: capped subsidies, and percentage of retiree premiums under the Sick and Annual Leave Program. The actuarial valuation assumes self-insured claims, fully-insured premiums, and administrative costs in excess of sponsor paid benefits, including explicit and implicit subsidies, will be paid by the retired member.

The plan sponsor provides a capped pay-as-you-go subsidy on behalf of eligible retired members. The capped pay-as-you-go subsidy per member depends on a capped aggregate annual dollar amount and the expected costs of the program. Based on *WV-RHBT Quarterly Financial Report for Fiscal Years 2022 to 2026*, dated July 2022, the capped subsidy rate for plan year end June 30, 2022, was \$144.70 per member per month.

As of June of 2021, the Humana MAPD not-to-exceed per member per month premium rates were decreased significantly from approximately \$148.62 for calendar year 2021 to \$64.57 for calendar year 2022. Not-to-exceed rates after 2022 were also decreased significantly to \$77.57 for CY 2023, \$87.57 for CY 2024, and \$97.57 for CY 2025. These changes are expected to reduce the capped subsidy rates. Based on additional information provided by WV-PEIA, the composite capped subsidy rates were reduced to \$115.46 for PY 2023, \$37.62 for PY 2024, \$55.18 for PY 2025, and \$71.98 for PY 2026. The composite capped subsidy rates reflect an aggregate PAYGO limit of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, \$30 million for PY 2025, and \$40 million for PY 2026.

The Sick and Annual Leave Program (SAL) allows members hired prior to July 1, 2001, to convert accrued sick leave and accrued annual leave balances at retirement into either retiree healthcare benefits or pension benefits. Members hired before July 1, 1988, may convert accrued sick or leave days into 100% of the required retiree healthcare contribution. Members hired from July 1, 1988, to June 30, 2001, may convert accrued sick or leave days into 50% of the required retiree healthcare contribution. The conversion rate is two days of unused sick and annual leave days per month for single healthcare coverage and three days of unused sick and annual leave days per month for family healthcare coverage.

Full-time higher education faculty members hired before July 1, 2009, who are employed on an annual contract basis for a period other than 12 months, upon retirement may extend years of teaching service into 100% of the employer-paid healthcare insurance coverage. The conversion rate is 3.3 years of teaching service for one year of single healthcare coverage and 5.0 years of teaching service for one year of family healthcare coverage.

Under the Retired Employee Assistance Program, the Plan provides premium subsidies to certain retirees if their income falls below 250% of the federal poverty level.

Overview

Most retired members are receiving benefits under the self-insured PPB Plan A for non-Medicare coverage and the fully-insured MAPD Plan 1 for Medicare coverage. The retired member's share of the premium depends on the date of hire and years of service at retirement. Members hired on or after July 1, 2010, pay 100% of the premium, resulting in no explicit or implicit subsidy to the plan sponsor. The following table shows representative plan year 2022 premium rates for single coverage under PPB Plan A and MAPD Plan 1:

| FY 2022 Monthly Premium | PPB Plan A ^a | MAPD Plan 1 ^a |
|--------------------------------|-------------------------|--------------------------|
| Hired on or after July 1, 2010 | \$1,160 | \$473 |
| 5 to 9 years service | 929 | 431 |
| 10 to 14 years service | 716 | 317 |
| 15 to 19 years service | 501 | 204 |
| 20 to 24 years service | 375 | 136 |
| 25 or more years service | 291 | 91 |

^a Premium rates are standard rates. Retirees receive a monthly discount of \$25 per tobacco-free covered member. It is assumed that 88% of future retirees and dependents are eligible for the preferred rates.

The WV-RHBT established a qualified trust to pre-fund sponsor benefit obligations. Future pre-funding contributions include a \$30 million annual contribution made by the State from 2017 through 2037, or if earlier, the year the employer benefit obligations are fully funded.

Long-term pre-funding assets are invested with the WVIMB. The strategic asset allocation consists of 50% equity, 15% fixed income, 5% private credit and income, 10% private equity, 10% real estate, and 10% hedge fund. Short-term assets used to pay current year benefits and expenses are invested with the WVBTI.

The Unfunded Actuarial Accrued Liabilities (UAAL) were amortized as a level percent of active member payroll over a 20-year closed period as of June 30, 2017. Unlike a level-dollar amortization which pays principal and interest each year, a level percent-of-pay (or increasing-payment) amortization may not finance principal for a period of time depending on the amortization period.

The UAAL represents the portion of the total actuarial present value of all future employer-provided benefits which is attributable to prior years, minus any actuarial valuation assets. It represents a measure of the unfunded liability allocable to past service. The cost and liabilities shown on the following pages are employer costs and liabilities, relating to the capped premium subsidy and the accrued sick and annual leave SAL program.

Actuarial Assumptions

In any long-term actuarial valuation (such as for Pensions and OPEBs), certain demographic, economic, and behavioral assumptions are made concerning the population, the investment discount rates, and the benefits provided. These actuarial assumptions form the basis for the actuarial model which is used to project the future population, the future benefits provided, and the future contributions collected. The discount rate assumption is used to discount projected net OPEB benefits to a present value. This and

Overview

other related present values are used to calculate the Actuarial Accrued Liability, Normal Cost, and Actuarially Determined Contribution.

The actuarial valuation results contained in the report reflect the Experience Review Study for the period from July 1, 2015, to June 30, 2020. This study includes OPEB and demographic experience that is specific to members who participate in the WV-RHBT Retiree Healthcare Program. Please refer to the full Experience Study Review report for additional details on the basis and development of the actuarial assumptions.

Certain healthcare benefits are evaluated at each measurement. Generally, these assumptions include the healthcare trend, per capita claim costs, the likelihood a member elects a certain healthcare plan, and the likelihood that a retiree selects one-person, two-person, or family coverage.

The interest rate used to discount expected future benefit payments was based on the expected return on current assets and pre-funding contributions that are expected to accumulate and fully fund the projected actuarial accrued liability. For pre-funded assets invested in the long-term WVIMB account, an investment return of 7.00% was assumed. For assets invested in the short-term WVBTI account, an investment return of 2.50% was assumed. An overall discount rate of 6.65% was used to develop the actuarial liability and normal costs, which was based on the average return on invested plan assets during the projection period. The key basis of the projection includes:

- The employer's aggregate capped subsidy of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, and \$30 million for PY 2025. After 2025, the plan is projected to be fully funded.
- Prior to 2026, the employer's total contribution equals the sum of State appropriations, aggregate capped contributions, SAL program contributions, and REAP program contributions.
- Approximately six months of self-insured claims, fully-insured premiums, and administrative expenses will be held in the WVBTI account.
- Investment earnings and principal from the WVIMB will be used to pay sponsor benefits only after the sponsor's benefit obligations are fully funded.
- After the program becomes fully funded, the sponsor contributes amounts needed to remain fully funded.
- Annual adjustments to premium rates so that retirees contribute approximately 35% to 38% of program costs.

Appendix A of the report contains a projection supporting the Single Discount Rate assumption. Appendix A shows that the program is projected to be fully funded by 2025 and the return on invested plan assets ranges from 6.75% to 6.91% during the projection period. For this purpose, fully funded means a funded ratio of at least 115% on a present value of benefits basis.

Actuarial Cost Method

WV-RHBT has selected the entry age normal cost method for this actuarial valuation which is an acceptable method and the required cost method for GASB Statements No. 74 and 75 financial reporting. This cost method spreads cost on a level percent of pay basis. The amortization of the Unfunded Actuarial Accrued Liability was calculated using a level percent of pay over a 20-year closed period, as of June 30, 2017.

Overview

The remainder of the report is an integral component of the actuarial valuation and includes:

- Actuarial valuation results and gain/loss analysis as of June 30, 2021;
- Statements of Fiduciary Net Position as of June 30, 2022, and Statements of Changes in Fiduciary Net Position as of June 30, 2022;
- GASB Statement No. 74 financial reporting information measured as of June 30, 2022, and applicable to the plan's fiscal year end June 30, 2022;
- GASB Statement No. 75 financial reporting information measured as of June 30, 2022, and applicable to the plan sponsor's fiscal year end June 30, 2023;
- Summary of actuarial assumptions and methods and plan provisions; and
- Projection of actuarial liabilities, normal costs, assets, benefits, and contributions measured as of June 30, 2021.

SECTION C

ACTUARIAL VALUATION RESULTS

Actuarial Valuation Results

Actuarial Valuation Results

The following section contains:

- A reconciliation of the Total OPEB Liability from June 30, 2020, to June 30, 2021, by source of (gain)/loss, and projection of the Total OPEB Liability as of June 30, 2022;
- Summary of actuarial valuation results as of June 30, 2020, by pension plan group;
- Summary of actuarial valuation results as of June 30, 2021, by pension plan group; and
- Comparison of actuarially determined contributions for the plan year end June 30, 2022, and June 30, 2021.

(Gain)/Loss Analysis as of June 30, 2021 and Projection to June 30, 2022

| West Virginia Retiree Health Benefit Trust Fund GASB 74/75 Total OPEB Liability Projected to June 30, 2022 | |
|---|-------------------------|
| Total OPEB Liability as of June 30, 2020^a | \$ 1,666,333,746 |
| Service Cost for Fiscal Year 2021 | \$ 21,649,978 |
| Employer Benefits and Expenses for Fiscal Year 2020 | \$ (113,282,000) |
| (Gain)/Loss due to Expected versus Actual Benefit Payments | \$ (39,957,344) |

| Total OPEB Liability as of June 30, 2021 | \$ 1,709,526,988 |
| Service Cost for Fiscal Year 2022 | \$ 18,845,641 |
| Employer Benefits and Expenses for Fiscal Year 2021 | \$ (60,202,000) |
| (Gain)/Loss due to Expected versus Actual Benefit Payments | \$ (42,779,131) |
| Interest | \$ 110,931,063 |
| Other Adjustments | \$ (51,797) |
| Total | \$ 26,743,776 |
| Expected Total OPEB Liability as of June 30, 2022 | \$ 1,736,270,764 |

^a Based on actuarial valuation as of June 30, 2020.

^b Reflects updates to mortality projection scale (MP-2021).

^c Based on available claims experience through December of 2021, and updated premium rates as of January of 2022. Reflects decreases in member premiums and capped PAYGO subsidy revenue based on data provided as of January of 2022. Assumes retiree premium, including SAL premium and REAP premium, will ultimately approach about 40% of expected claims, capitation, and other healthcare-related expenses during the next 25-year projection period.

Actuarial Valuation Results

WVIMB Target Asset Allocation as of 2021

WV - RHBT

GASB Nos. 74 and 75 Actuarial Valuation as of June 30, 2021

Measured as of June 30, 2021, and applicable for the fiscal year end June 30, 2022

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future rates of return by the target asset allocation percentage. Target asset allocations, capital market assumptions ("CMA"), and forecast returns were provided by the plan's investment advisors, including the West Virginia Investment Management Board ("WV-IMB"). The projected return for the Money Market Pool held with the West Virginia Board of Treasury Investments ("WV-BTI") was estimated based on WV-IMB assumed inflation of 2.0% plus a 25 basis point spread.

| | Current Policy Target <u>Asset Allocation</u> | CMA 10-Year | |
|--|--|-------------------------------------|-------------------------------|
| | | <u>Geometric Nominal Return</u> | <u>Standard Deviation</u> |
| WV-IMB^a | | | |
| Global Equity | 55.0 % | 6.8 % | 17.1 % |
| Core Plus Fixed Income | 15.0 % | 4.1 % | 8.4 % |
| Core Real Estate | 10.0 % | 6.1 % | 12.9 % |
| Hedge Fund | 10.0 % | 4.4 % | 7.8 % |
| Private Equity | 10.0 % | 8.8 % | 25.6 % |
| Target Allocation^a | 100.0 % | | |
| Percentage of Portfolio^b | 95.0 % | | |
| Forecast 10-year Return^{a,c} | | 6.7 % | |
| Standard Deviation^a | | 13.1 % | |
| CMA 10-year Inflation^a | | 2.0 % | |
| 10-year Real Return | | 4.7 % | |
| Actuarial Valuation Inflation Assumption | | 2.25 % | |
| 10-year Nominal Return after Inflation Adjustment | | 6.95 % | |
| Actuarial Valuation Return Assumption^d | | 7.00 % | |
| | | Expected Return | |
| WV-BTI | | | |
| Money Market Pool with 2.00% inflation ^d | 100.0 % | 2.25 % | |
| Percentage of Portfolio^b | 5.0 % | | |

^a Target asset allocation, capital market assumptions, and forecast of 10-year returns provided by WV-IMB.

^b Based on invested assets as of June 30, 2019, June 30, 2020, and assumptions used for long-term projection.

^c Ten-year forecast returns provided by WV-IMB are based on gross market return assumption for each asset class. WV-IMB utilizes active management and generally expects actively managed net returns to meet or exceed forecast net returns.

^d For the actuarial valuation as of June 30, 2020, inflation assumption was changed to 2.25%, WV-IMB return was changed to 7.00%, and WV-BTI return was changed to 2.50%.

SECTION D-I

GASB STATEMENT No. 74 INFORMATION

Auditor's Note – This information is intended to assist in preparation of the plan sponsor's financial statements relating to the West Virginia Retiree Health Benefit Trust Fund. Financial statements are the responsibility of management, subject to the auditor's review. Please let us know if the auditor recommends any changes.

GASB Statement No. 74 Information

Discussion

Accounting Standard

For postemployment (OPEB) benefit plans that are administered through trusts or equivalent arrangements, Governmental Accounting Standards Board (GASB) Statement No. 74, “Financial Reporting for Postemployment Benefit Plans other than Pension Plans,” replaces the requirements of GASB Statement No. 43, “Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans.” GASB Statement No. 74 establishes standards of financial reporting for separately issued financial reports of state and local government OPEB plans.

GASB Statement No. 75 replaces the requirements of GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, as amended, and No. 57, OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans, for OPEB.

GASB Statements No. 74 and 75 are effective for fiscal years beginning after June 15, 2016, and June 15, 2017, respectively.

The following discussion provides a summary of the information that is required to be disclosed under these accounting standards.

Plan Financial Statements

GASB Statement No. 74 requires defined benefit OPEB plans which are administered as trusts or equivalent arrangements to present two financial statements: a statement of fiduciary net position and a statement of changes in fiduciary net position. The statement of fiduciary net position presents the assets and liabilities of the OPEB plan at the end of the OPEB plan’s reporting period. The statement of changes in fiduciary net position presents the additions, such as contributions and investment income, and deductions, such as benefit payments and expense, and net increase or decrease in the fiduciary net position.

GASB Statement No. 75 requires state and local government employers to recognize the net OPEB liability and the OPEB expense on their financial statements, along with the related deferred outflows and inflows of resources. The net OPEB liability is the difference between the total OPEB liability and the plan’s fiduciary net position. In traditional actuarial terms, this is analogous to the accrued liability less the market value of assets.

The OPEB expense recognized each fiscal year is equal to the change in the net OPEB liability from the beginning of the year to the end of the year, adjusted for deferred recognition of the liability and investment experience.

GASB Statement No. 75 requires that employer contributions made to the OPEB plan subsequent to the measurement date and before the end of the employer’s reporting period should be reported as a deferred outflow of resources.

GASB Statement No. 74 Information

Notes to Financial Statements

GASB Statement No. 75 requires the notes of the employer's financial statements to disclose the total OPEB expense, the OPEB plan's liabilities and assets, and deferred outflows of resources and inflows of resources related to OPEB.

GASB Statements No. 74 and 75 require the notes of the financial statements for the Plan and Plan Sponsor to include certain additional information. The list of disclosure items should include:

- The name of the OPEB plan, the administrator of the OPEB plan, and the identification of whether the OPEB plan is a single-employer, agent, or cost-sharing OPEB plan;
- A description of the benefits provided by the plan;
- A brief description of changes in benefit terms or assumptions that affected the measurement of the total OPEB liability since the prior measurement date;
- The number of plan members by category and if the plan is closed;
- A description of the plan's funding policy, which includes member and employer contribution requirements;
- The OPEB plan's investment policies;
- The OPEB plan's fiduciary net position and the net OPEB liability;
- The net OPEB liability using +/- 1% change on the discount rate;
- The net OPEB liability using +/- 1% change on the healthcare trend rate;
- Significant assumptions and methods used to calculate the total OPEB liability;
- Inputs to the discount rates; and
- Certain information about mortality assumptions and the dates of experience studies.

OPEB plans that are administered through trusts or equivalent arrangements are required to disclose additional information in accordance with GASB Statement No. 74. This information includes:

- The composition of the OPEB plan's Board and the authority under which benefit terms may be amended;
- A description of how fair value is determined;
- Information regarding certain reserves and investments, which include concentrations of investments greater than or equal to 5%, receivables, and insurance contracts excluded from plan assets; and
- Annual money-weighted rate of return.

Required Supplementary Information

GASB Statement No. 74 requires a 10-year fiscal history of:

- Sources of changes in the net OPEB liability.
- Information about the components of the net OPEB liability and related ratios, including the OPEB plan's fiduciary net position as a percentage of the total OPEB liability, and the net OPEB liability as a percent of covered-employee payroll.
- Comparison of the actual employer contributions to the actuarially determined contributions based on the plan's funding policy.
- For plans with an actuarially determined contribution, the schedule covering each of the 10 most recent fiscal years of the actuarially determined contribution, contributions to the OPEB plan, and related ratios.

GASB Statement No. 74 Information

Frequency and Timing of the Actuarial Valuation

An actuarial valuation to determine the total OPEB liability is required to be performed at least once every two years. For the employer's financial reporting purposes, the net OPEB liability and OPEB expense should be measured as of the employer's "measurement date," which may not be earlier than the employer's prior fiscal year end-date. If the actuarial valuation used to determine the total OPEB liability is not calculated as of the measurement date, the total OPEB liability is required to be rolled forward from the actuarial valuation date to the measurement date.

Single Discount Rate

Projected benefit payments are required to be discounted to their actuarial present values using a Single Discount Rate that reflects (1) a long-term expected rate of return on OPEB plan investments to the extent that the plan's fiduciary net position is projected to be available and sufficient to pay benefits, and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date to the extent that the benefits are effectively financed on a pay-as-you-go basis.

Since the RHBT is projected to be fully funded by fiscal year end June 30, 2025, and plan assets are available to pay benefits and expenses in all future years, we have assumed a rate of 6.65% for the long-term expected return on plan assets and the discounting of future plan obligations. Please see Appendix A for a projection supporting the 6.65% long-term return and discount rate assumptions.

Actuarial Assumptions

The actuarial assumptions used to value actuarial liabilities are outlined in detail in Section E. Healthcare-related assumptions include: per capita claim costs, trend rates, aging factors, and participation rates. The pension-related assumptions were based on experience studies conducted by the pension system's actuary as approved by the pension system. The OPEB-related assumptions were based on a recent experience study conducted by GRS and approved by WV-RHBT.

Future Uncertainty or Risk

Future results may differ from those anticipated in this actuarial valuation. Reasons include, but are not limited to:

- Claims experience differing from expected;
- Healthcare trend experience differing from expected;
- Changes in the healthcare plan designs offered to active and retired members;
- Changes in healthcare related costs due to recent experience; and
- Participant behavior differing from expected; e.g.,
 - Elections at retirement;
 - One-person versus two-person coverage elections; and
 - Timing of retirement or termination.

GASB Statement No. 74 Information

Benefits Valued

The benefit provisions that were valued are described in Section F. The actuarial valuation is required to be performed on the current benefit terms and existing legal agreements. Consideration is to be given to the written plan document as well as other communications between the employer and plan members and an established pattern of practice for cost sharing. The summary of major plan provisions is designed to outline principal plan benefits.

GASB Statement No. 74 Information

The actuarial valuation as of June 30, 2021, with a measurement date of June 30, 2022, was prepared for purposes of complying with the requirements of GASB Statement No. 74 for the plan fiscal year end June 30, 2022.

A number of disclosure items are provided in this report. However, certain non-actuarial information, such as notes regarding accounting policies and investments, is not included in this report. As a result, the plan sponsor will be responsible for preparing and disclosing the non-actuarial information needed to comply with these accounting standards.

This section contains the following GASB Statement No. 74 information:

- GASB Statement No. 74 Executive Summary;
- GASB Statement No. 74 Changes in Net OPEB Liability for plan year end June 30, 2022, applicable to plan's fiscal year end June 30, 2022;
- GASB Statement No. 74 Sensitivity of Net OPEB Liability plan year end June 30, 2022;
- GASB Statement No. 74 Schedule of Changes in Net OPEB Liability and Related Ratios Multiyear;
- GASB Statement No. 74 Schedule of Contributions; and
- Notes to Schedule of Contributions.

| WVBTI Short-Term Expected Rate of Investment Return | 2.50% |
| Long-Term Municipal Bond Rate Beginning of Year ^c | 1.92% |
| Long-Term Municipal Bond Rate End of Year ^c | 3.69% |
| | |
| Year WV-RHBT is Projected to be Fully Funded ^d | 2022 |

^a Represents eligible waived annuitants under age 75. It is assumed that 2.5% of these members will elect coverage.

^b Covered payroll excludes members hired on or after July 1, 2010, and is based on the payroll data provided as of the actuarial valuation date increased with one year of wage inflation.

^c Based on fixed-income municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of June 30, 2021, and June 30, 2022. In describing this index, Fidelity notes that the municipal curves are constructed using option-adjusted analytics of a diverse population of over 10,000 tax-exempt securities.

^d Based on actuarial valuation projection as of June 30, 2021, before considering extraordinary investment losses during plan year end June 30, 2022. After considering investment losses in 2022, the plan is likely to be fully funded by 2026. For this purpose, fully funded is defined as a funded ratio of at least 115% on a present value of benefits basis.

| Plan Fiduciary Net Position - Ending (b) | 1,624,972,000 | 1,673,024,000 | 1,224,642,000 | 1,091,660,803 | 963,114,601 | 823,911,315 |
| Net OPEB Liability - Ending (a) - (b) | \$ 111,298,764 | \$ (29,734,708) | \$1,588,406,891 | \$1,939,101,451 | \$2,422,569,699 | \$2,458,989,094 |
| Plan Fiduciary Net Position as a Percentage of Total OPEB Liability | 93.59% | 101.81% | 43.53% | 36.02% | 28.45% | 25.10% |
| Covered-Employee Payroll^b | \$1,571,757,762 | \$1,662,544,357 | \$1,768,975,119 | \$1,892,941,244 | \$2,286,998,500 | \$2,199,037,019 |
| Net OPEB Liability as a Percentage of Covered-Employee Payroll | 7.08% | -1.79% | 89.79% | 102.44% | 105.93% | 111.82% |

^a The Plan Fiduciary Net Position at the beginning of plan year 2018 was adjusted by \$104,389 to account for the cumulative effect of adoption of accounting principle.

^b Plan year end 2022 payroll based on projected closed group payroll from 2021 actuarial valuation.

GASB Statement No. 74 Information

Sensitivity of Net OPEB Liability

Regarding the sensitivity of the net OPEB liability to changes in the Single Discount Rate, the following presents the plan's net OPEB liability, calculated using a Single Discount Rate of 6.65%, as well as what the plan's net OPEB liability would be if it were calculated using a Single Discount Rate that is one percentage point higher or lower:

Sensitivity of Net OPEB Liability as of June 30, 2022, to the Single Discount Rate Assumption

| 1% Decrease | Current Single Discount Rate Assumption | 1% Increase |
|----------------|--|-----------------|
| 5.65% | 6.65% | 7.65% |
| \$ 286,080,495 | \$ 111,298,764 | \$ (38,643,981) |

Regarding the sensitivity of the net OPEB liability to changes in the healthcare cost trend rates, the following presents the plan's net OPEB liability, calculated using the assumed trend rates as well as what the plan's net OPEB liability would be if it were calculated using a trend rate that is one percentage point higher or lower:

Sensitivity of Net OPEB Liability as of June 30, 2022, to the Healthcare Cost Trend Rate Assumption

| 1% Decrease | Healthcare Cost Trend Rates Assumption | 1% Increase |
|-----------------|---|----------------|
| \$ (63,275,842) | \$ 111,298,764 | \$ 317,866,319 |

GASB Statement No. 74 Information

GASB Statement No. 74 Information

Notes to Schedule of Contributions

| | |
|-------------------------|---------------|
| Valuation Date | June 30, 2021 |
| Measurement Date | June 30, 2022 |
| Plan Year End | June 30, 2022 |

Methods and Assumptions Used to Develop Actuarially Determined Contribution:

| | |
|-----------------------------|--|
| Actuarial Cost Method | Entry Age Normal |
| Amortization Method | Level percentage of payroll, closed |
| Amortization Period | 20-year closed period as of June 30, 2017 |
| Asset Valuation Method | Market value |
| Investment Rate of Return | 6.65%, net of OPEB plan investment expense, including inflation |
| Inflation | 2.25% |
| Wage Inflation | 2.75% for PERS and TRS, 3.25% for Troopers |
| Salary Increases | Rates based on 2015-2020 OPEB Experience Study and depend on pension plan participation and attained age, and range from 2.75% to 5.18%, including inflation. Rates were first applied to the 2020 valuation. |
| Retirement Age | Rates based on 2015-2020 OPEB Experience Study and vary by pension plan participation and age/service at retirement. Rates were first applied to the 2020 valuation. |
| Mortality | Post-Retirement: Pub-2010 General Healthy Retiree Mortality Tables (100% males, 108% females) projected with Scale MP-2021 for TRS. Pub-2010 General Below Median Healthy Retiree Mortality Tables (106% male, 113% female) projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Healthy Retiree Mortality Tables (100% male, 100% female) projected with Scale MP-2021 for Troopers A and B. Pre-Retirement: Pub-2010 General Employee Mortality Tables (100% male, 100% female) projected with Scale MP-2021 for TRS. Pub-2010 Below-Median Income General Employee Mortality Tables projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Employee Mortality Tables projected with Scale MP-2021 for Troopers A and B. |
| Healthcare Cost Trend Rates | Trend rate for pre-Medicare per capita costs of 7.0% for plan year end 2023, decreasing by 0.5% for two years then by 0.25% each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2032. Trend rate for Medicare per capita costs of 8.83% for plan year end 2023, decreasing ratably each year thereafter, until ultimate trend rate of 4.25% is reached in plan year end 2032. |
| Aging Factors | Based on the 2013 SOA Study "Health Care Costs - From Birth to Death" |
| Expenses | Health administrative expenses are included in the development of the per capita claims costs. Operating expenses are included as a component of the annual expense. |

GASB Statement No. 74 Information

Single Discount Rate

A Single Discount Rate of 6.65% was used to measure the total OPEB liability. This Single Discount Rate was based on the expected rate of return on OPEB plan investments of 6.65%. The projection of cash flows used to determine this Single Discount Rate assumed that employer contributions will be made in accordance with the prefunding and investment policies. See Appendix A for a projection supporting the development of the Single Discount Rate. Based on these assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

Summary of Membership Information

The following table provides a summary of the number of participants in the plan:

| | |
|---|---------------|
| Members or Beneficiaries Currently Receiving Benefits | 43,017 |
| Waived Annuitants ^a | 13,189 |
| Active Plan Members | <u>31,812</u> |
| Total Plan Members | 88,018 |

^a The actuarial valuation assumes 2.5% of eligible waived annuitants under the age of 75 will select retiree healthcare coverage on the valuation date. As of June 30, 2021, there were 13,189 waived annuitants under the age of 75 who were included in the actuarial valuation, and so approximately 330 were assumed to elect coverage as of June 30, 2021. Also, 6,257 waived annuitants over the age 75 were excluded from the actuarial valuation.

SECTION D-II

GASB STATEMENT No. 75 INFORMATION

Auditor's Note – This information is intended to assist in preparation of the plan sponsor's financial statements relating to the West Virginia Retiree Health Benefit Trust Fund. Financial statements are the responsibility of management, subject to the auditor's review. Please let us know if the auditor recommends any changes.

Deferred Outflows and Deferred Inflows of Resources by Source to be Recognized in Future OPEB Expenses as of June 30, 2022

| | Deferred (Inflows) of Resources | Deferred Outflows of Resources |
|--|--|---|
| Difference Between Expected and Actual Experience | \$ (141,983,636) | \$ - |
| Changes in Assumptions | (282,790,940) | 71,376,393 |
| Net Difference Between projected and Actual Earnings on OPEB Plan Investments | (178,805,135) | 196,080,960 |
| Total | \$ (603,579,711) | \$ 267,457,353 |

^a Represents eligible waived annuitants under age 75. It is assumed that 2.5% of these members will elect coverage.

^b Covered payroll excludes members hired on or after July 1, 2010. Covered Payroll for Plan year end 2022 is based on projected closed group payroll from 2021 actuarial valuation.

^c Based on fixed-income municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of June 30, 2020, and June 30, 2021. In describing this index, Fidelity notes that the municipal curves are constructed using option-adjusted analytics of a diverse population of over 10,000 tax-exempt securities.

^d Based on actuarial valuation projection as of June 30, 2021, before considering extraordinary investment losses during plan year end June 30, 2022. After considering investment losses in 2022, the plan is likely to be fully funded by 2026. For this purpose, fully funded is defined as a funded ratio of at least 115% on a present value of benefits basis.

| Net OPEB Liability End of Year | \$ | 111,298,764 |

GASB Statement No. 75 Information

Recognition of Deferred Outflows and Inflows of Resources

Differences between expected and actual experience and changes in assumptions are recognized in OPEB expense using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all employees that are provided with OPEB through the OPEB plan (active employees and inactive employees) determined as of the beginning of the measurement period.

At the beginning of the current measurement period, the expected remaining service lives of all active members expected to receive a plan benefit was approximately 268,577 years. Additionally, the total number of plan members expected to receive a plan benefit as of the actuarial valuation date was 75,159. As a result, the average of the expected remaining service lives for plan members expected to receive a plan benefit for purposes of recognizing the applicable deferred outflows and inflows of resources established in the current measurement period is 3.573 years.

Additionally, differences between projected and actual earnings on OPEB plan investments should be recognized in OPEB expense using a systematic and rational method over a closed five-year period. For this purpose, the deferred outflows and inflows of resources are recognized in the OPEB expense as a level dollar amount over the closed period identified above.

GASB Statement No. 75 Information

Statement of Outflows and Inflows Arising from Current and Prior Reporting Periods Measured as of June 30, 2022, Applicable to Plan Sponsor's Fiscal Year End June 30, 2023

^b Plan year end 2022 payroll based on projected closed group payroll from 2021 actuarial valuation.

SECTION E

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

Summary of Actuarial Assumptions and Methods

Development of Per Capita Claim Costs

Per capita claim costs for the self-insured PPB plans were developed using the following information:

- Incurred medical and prescription drug claims, enrollment, and administrative expense data for calendar years 2019, 2020, and 2021, as provided by WV-RHBT.

Costs for plan year end June 30, 2022, were based on:

- Average costs for calendar years 2019, 2020, and 2021 projected to the 12-month rating period ending June 30, 2022, using historical annual trend rates of 5% for medical experience and 8% for prescription drug experience; and
- Overall average costs for plan year end June 30, 2022, using trend adjusted historical costs weighted by 16.7% for 2019 experience, 33.3% for 2020 experience, and 50.0% for 2021 experience.
- Per capita costs were increased by 2.17% to reflect healthcare-related administrative expenses. The 2.17% expense adjustment was based on historical expense and claims estimates contained in CCA's annual reports.

Per capita claim costs for the fully-insured Humana MAPD plans were developed using the following information:

- Incurred medical and prescription drug claims, prescription drug rebates, and enrollment data for calendar years 2017 and 2018, as provided by WV-RHBT;
- Humana's renewal premium rating reports applicable to calendar years 2017, 2018, 2019, and 2020 (including not to exceed rates for calendar year 2021), which provide projected: medical and prescription drug costs, CMS reimbursement rates for medical and prescription drug costs, administrative/profit margins, and other adjustments; and
- Humana's gain sharing reports applicable to calendar years 2017 and 2018, which compare renewal premium rates against actual experience, and provide gain sharing adjustments for favorable claim and CMS reimbursement rates experience.
- Humana's not-to-exceed rates for calendar years 2022 through 2025. MAPD premium rates are updated as of January 1.

Average MAPD costs for calendar years 2019, 2020 and 2021 were based on:

- Calendar year 2018 incurred claims increased by 3% for medical cost and 4% for prescription drug costs;
- Drug rebate rate of 37% of projected drug claims;

Summary of Actuarial Assumptions and Methods

- CMS reimbursement rate of 100% of projected medical costs and 38% of projected prescription drug costs net of rebates;
- Administrative/profit margins based on historical rates through calendar year 2019 before any gain sharing or “business decision” adjustments;
- Elimination of ACA Health Insurance Tax; and
- Average MAPD per capita costs on and after 2022 were based on 40% of projected experience-based rates plus 60% of projected not-to-exceed rates.

Medicare per capita costs were based on 97% of MAPD per capita costs plus 3% of Medicare PPB per capita costs.

Future per capita costs were trended from the mid-point of the current rating period to the mid-point of the following rating period.

Cost Method and Expense Calculations for Retiree Healthcare Benefits

The retiree healthcare actuarial valuation was based on the entry age normal cost method. Under this method, each participant’s projected benefit is allocated on a level percent of pay basis from entry age to assumed exit age. Under GASB Statements No. 74 and 75, the entry age normal method is the required cost method.

The Actuarial Accrued Liability is the portion of the present value associated with pay prior to the actuarial valuation date. The Normal Cost is the portion of the present value associated with pay during the current plan year.

The Actuarially Determined Contribution equals the normal cost plus the amortization of the unfunded actuarial accrued liability. The actuarial valuation is based on a level-percentage-of-pay closed amortization period with 16 years remaining as of June 30, 2021.

Summary of Actuarial Assumptions and Methods

Actuarial Assumptions

The actuarial assumptions used in our actuarial valuation are outlined on the following pages.

| | |
|---|--|
| Actuarial Valuation Date | June 30, 2021 |
| Discount Rate | 6.65% |
| Return on Assets Invested with WVIMB | 7.00% |
| Return on Assets Invested with WVBTI | 2.50% |
| Inflation | 2.25% |
| Wage Inflation | 2.75% for PERS and TRS, and 3.25% for Troopers |

| 2031 | 4.50% | 5.00% | | 4.29% | 5.50% | |
| 2032 | 4.25% | 4.75% | | 4.25% | 5.25% | |
| 2033 | 4.25% | 4.50% | | 4.25% | 5.00% | |
| 2034 | 4.25% | 4.25% | | 4.25% | 4.75% | |
| 2035 | 4.25% | 4.25% | | 4.25% | 4.50% | |
| 2036 | 4.25% | 4.25% | | 4.25% | 4.25% | |
| 2037 + | 4.25% | 4.25% | | 4.25% | 4.25% | |

The funded ratio, on a present value of benefits basis, is projected to exceed 105% by plan year end 2025. Consequently, based on the revised funding policy, the employer capped subsidy PAYGO contributions were set to zero on and after plan year end 2026.

MAPD premiums for calendar year 2023 were adjusted based on information provided by RHBT.

Costs were trended from the mid-point of current period to the mid-point of following period.

Summary of Actuarial Assumptions and Methods

Our projection of net employer expenditures assumes:

- The employer’s PAYGO contribution aggregate limit of \$75 million for PY 2022, \$60 million for PY 2023, \$20 million for PY 2024, and \$30 million for PY 2025.
- The sponsor’s contributions equal the sum of State appropriations, employer PAYGO subsidy contribution, and expected employer contributions from the SAL program and REAP program.
- The plan year 2022 per retiree per month PAYGO subsidy of \$522.28 for non-Medicare coverage and \$92.49 for Medicare coverage. Projected capped rates change at the assumed trend rates applicable to capped subsidies.
- Member's share of total plan costs remains stable at approximately 35% to 38% of program costs.
- Under the revised funding policy, the Plan receives PAYGO subsidy contributions if the funded ratio, on a present value of benefits basis, is less than 105%. Also, under the revised funding policy, the Plan receives the \$30 million annual State appropriation if the funded ratio, on a present value of benefits basis, is less than 115%. Based on the projections provided in Appendix A, employer PAYGO subsidy contributions end in plan year end 2025, and the State appropriation of \$30 million per year ends in plan year end 2028.

Our projections also assume (i) the plan sponsor contributes one percent of expected costs towards the Retired Employee Assistance Program and (ii) the sponsor’s operating expenses are approximately 2.25% of prior year operating expenses.

Average morbidity factors used for the valuation are shown below.

| Average Morbidity Factor | | |
|--------------------------|--------|--------|
| Age | Male | Female |
| 20 to 24 | -3.24% | 5.77% |
| 30 to 34 | 4.50% | 1.71% |
| 35 to 39 | 4.54% | -0.25% |
| 40 to 44 | 4.48% | 1.12% |
| 45 to 49 | 5.42% | 3.05% |
| 50 to 54 | 5.64% | 3.12% |
| 55 to 59 | 5.25% | 3.10% |
| 60 to 64 | 4.68% | 3.78% |
| 65 to 69 | 1.73% | 2.25% |
| 70 to 74 | 1.44% | 1.61% |
| 75 to 79 | 0.98% | 1.12% |
| 80 to 84 | 0.15% | 0.73% |
| 85 to 89 | -0.37% | 0.20% |
| 90 to 94 | -0.28% | -0.81% |

| 98 + | 1,375 | 1,295 |

Summary of Actuarial Assumptions and Methods

Coverage and Continuance Assumption: The percentage of members that elect spousal healthcare coverage is shown below. Of the members electing two-person coverage, it is assumed that 100% of the surviving spouses would continue coverage after the death of the retiree.

| Coverage Type | Coverage Type Rate | | |
|-------------------|--------------------|-------|------------------|
| | PERS | TRS | Troopers A and B |
| Single | 47.0% | 43.0% | 30.0% |
| Two-Person/Family | 53.0% | 57.0% | 70.0% |

Retired Employee Assistance Program: The liability for the Retired Employee Assistance program was assumed to equal one percent of the present value of future self-insured claims and fully-insured premiums.

Data: Members hired on or after July 1, 2010, pay 100% of the costs of providing retiree healthcare benefits, resulting in no implicit or explicit subsidies from the plan sponsor, and have been excluded from the actuarial valuation.

Retirees designated as belonging to Teachers' Retirement System were valued with the corresponding mortality assumptions. Those designated as belonging to the Deputy Sheriffs Retirement System, Emergency Medical Service Retirement System, Troopers Plan A, or Troopers Plan B, were valued using mortality tables specific to public safety members. Remaining retired members were valued under the Public Employees' Retirement System post-retirement mortality assumption.

If pay for an active member was not provided, the member's pay was estimated using the average pay of the member's assigned pension system. Service amounts were adjusted if the member's calculated entry age, using the length of employment, was unreasonable.

The actuarial valuation assumes 2.5% of all waived annuitants under the age of 75 will select retiree healthcare coverage as of the actuarial valuation date. As of June 30, 2021, there are 13,189 waived annuitants under the age of 75, and so approximately 330 were assumed to elect coverage as of June 30, 2021. Also, as of June 30, 2021, 6,257 waived annuitants age 75 and over were excluded from the actuarial valuation.

Gender codes, where missing, were set randomly such that the group-specific gender distribution is consistent with that observed among members with gender information provided. Approximately 50%, 30%, and 90% of members are male for retiree valuation groups PERS, TRS, and Public Safety, respectively.

Other Assumptions:

Healthcare benefits for waived retirees were assumed to commence at the later of attained age or age 60.

Assumptions pertaining to PERS were applied to Local Agencies except where otherwise noted.

Liabilities for dependent children were estimated by increasing non-Medicare spouse per capita costs by 8.0%.

OPEB Assumptions

¹ Applicable normal retirement rate if Troopers A member has attained age 50 with at least 20 years of service or Troopers B member has attained age 50 with at least 25 years of service.

² Applicable normal retirement rate if Troopers B member has attained age 52 with at least 20 years.

Normal retirement eligibility is at least 20 years of service and at least age 50 for Troopers A, and at least 25 years of service and at least age 50 or at least 20 years of service and at least age 52 for Troopers B. Early retirement eligibility is at least 25 years of service and under age 50 for Troopers A, and at least 20 years of service and under age 52 for Troopers B. The early retirement rate equals 3 percent if the member is eligible for early retirement. The waived rate was set to 2 percent if the member was eligible for early retirement. 100 percent retirement is assumed at age 55.

SECTION F

SUMMARY OF PRINCIPAL PLAN PROVISIONS

Summary of Principal Plan Provisions

Plan Year 2022 Benefits

PLAN MEMBERS

Members receiving retirement benefits from certain pension systems administered by CPRB are eligible to receive postretirement healthcare benefits. The retirement systems include Public Employees' Retirement System (PERS), Teachers' Retirement System (TRS), Teachers' Defined Contribution Retirement System (TDCRS), Great West (Plan G), West Virginia Death, Disability, and Retirement Fund (Troopers Plan A), West Virginia State Police Retirement System (Troopers Plan B), Deputy Sheriffs' Retirement System (DSRS), Emergency Medical Services Retirement System (EMSRS), and Judges' Retirement System (JRS). Certain members receiving annuities through the Teachers' Insurance and Annuity Association and College Retirement System (TIAA-CREF) are also eligible to receive postretirement healthcare benefits.

Following are the retirement eligibility provisions for pension benefits for Tier 1 members (hired prior to July 1, 2015). Members hired on or after July 1, 2010 (Including Tier 2 members), pay 100% of the costs of providing retiree healthcare benefits, resulting in no implicit or explicit subsidies from the plan sponsor, and have been excluded from the actuarial valuation. The following retirement eligibility requirements are based on information contained in the most recent pension actuarial valuation report.

PENSION ELIGIBILITY PROVISIONS

PUBLIC EMPLOYEES' RETIREMENT SYSTEM

Normal Retirement

Members who have reached or attained age 60 and earned 5 or more years of contributing service are eligible for a normal retirement benefit.

Early Retirement

Members with at least 3 years of contributing service, who have attained age 55 and the sum of age plus years of contributing service is 80 or more, are eligible for an unreduced early retirement benefit. Terminating members with at least 3 years of contributing service who either (i) have attained age 55 and completed 10 years of credited service, or (ii) have completed 20 years of credited service, are eligible for a reduced early retirement benefit beginning at age 55. Terminating members with 30 years of credited service, which includes at least 3 years of contributing service, may also retire at any age for a reduced early retirement benefit.

Summary of Principal Plan Provisions

Plan Year 2022 Benefits

Disability Retirement

Members who have completed 10 years of credited service, including 3 years of contributing service, who are found to be totally and permanently disabled are eligible for a disability benefit. Members with less than 10 years of credited service, or less than 3 years of contributing service, who incur service-connected total and permanent disability and are receiving worker's compensation for this disability are eligible for a disability benefit.

TEACHERS' RETIREMENT SYSTEM

Normal Retirement

Members with 35 years credited service or age 60 and 5 years credited service may retire with an unreduced pension.

Early Retirement

Members with 30 years of credited service may retire at any age, with the pension reduced for members retiring before age 55.

Disability Retirement

Members with 10 years of credited service may be eligible to receive a disability retirement benefit if disabled for 6 months, unable to perform his or her regular occupation and the Retirement Board expects the disability to be permanent.

DEPARTMENT OF PUBLIC SAFETY DEATH, DISABILITY, AND RETIREMENT FUND (PLAN A)

Normal Retirement

Members having attained age 50 and 20 or more years of contributory service, or are any age and have earned 25 or more years of contributory and military service, are eligible for a normal retirement benefit.

Duty-Related Disability Retirement

Members disabled in the line of duty and are rendered unable to perform their duties are eligible for a duty-related disability retirement. The member is partially disabled if he can hold other employment and totally disabled if he cannot.

Nonduty-Related Disability Retirement

Members disabled other than in the line of duty and rendered unable to perform their duties as a member of the Department are eligible for disability retirement.

Summary of Principal Plan Provisions

Plan Year 2022 Benefits

STATE POLICE RETIREMENT SYSTEM (PLAN B)

Normal Retirement

Members who have attained age 50 and earned 25 or more years of contributory service, or have attained age 52 and earned 20 or more years of contributory service, are eligible for a normal retirement benefit.

Early Retirement

Members with 20 or more years of contributory service may retire early at any age.

Disability Retirement

Members disabled in the line of duty and are rendered unable to perform their duties are eligible for a duty-related disability retirement. The member is partially disabled if he can hold other employment and totally disabled if he cannot.

Non-Duty-Related Disability Retirement

Members disabled other than in the line of duty and rendered unable to perform their duties as a member of the Department are eligible for disability retirement.

Summary of Principal Plan Provisions

Plan Year 2022 Benefits

DEPENDENTS ELIGIBLE FOR COVERAGE

Plan members who enroll in PEIA may also enroll the following dependents: legal spouse, biological children, adopted children or stepchildren under the age of 26, or other children for whom the member is the court-appointed guardian up to the age of 18.

ENROLLMENT TIMING

Members not previously enrolled in a PEIA Plan are eligible to enroll at the time of retirement provided the last employer immediately prior to retirement is a participating employer in the PEIA Plan and State retirement system or a PEIA approved retirement system.

SURVIVING SPOUSE COVERAGE

Spouses of employees/retirees who die and were insured as a spouse or dependent under the policyholder's coverage by PEIA at the time of death are eligible to continue health coverage as a policyholder in their own right under their health plan. Coverage is terminated if the surviving spouse remarries.

Dependents of employees/retirees who die and were insured as a dependent under the policyholder's coverage by PEIA at the time of death are eligible to continue health coverage as a policyholder in their own right under their health plan. Dependent children are subject to the same age restrictions as other dependent children in the PEIA plan. A married surviving dependent child may not enroll their spouse for PEIA coverage.

Beginning July 1, 2015, surviving spouses/dependents enrolling in the PEIA plan pay premiums based on the years of service earned by the deceased policyholder. Current surviving spouses/dependents, and those who were enrolled before July 1, 2015, were grandfathered under the previous benefit and continue to pay premiums based on 25 or more years of service.

MEDICARE

Coverage through PEIA becomes secondary to Medicare after Medicare eligibility has been reached. When eligible for Medicare, members must enroll in Medicare Parts A and B in order to be eligible for PEIA's Medicare Advantage Plan or the Special Medicare Plan.

Summary of Principal Plan Provisions Plan Year 2022 Benefits

OPEB PROGRAMS

Following are the premium rates assumed for future pre-Medicare and post-Medicare retirees. Premiums rates for current pre-Medicare and post-Medicare retirees were provided by WV-RHBT and are based on the plan elected by the member. Premiums are assumed to increase by the trend assumption. Members retiring before June 30, 1997, pay premiums based on 25 or more years of service regardless of actual service at retirement.

| Plan Year 2021 Monthly PPO PPB Plan A Premium | Pre-Medicare PPB Plan A ^{a, b} | | Pre/Post Medicare PPB Plan A ^{a, b} |
|---|--|---------|---|
| | Single | Family | Family |
| Hired on or after July 1, 2010 | \$1,160 | \$2,760 | \$1,934 |
| 5 to 9 years service | 929 | 2,209 | 1,548 |
| 10 to 14 years service | 716 | 1,665 | 1,153 |
| 15 to 19 years service | 501 | 1,124 | 760 |
| 20 to 24 years service | 375 | 799 | 526 |
| 25 or more years service | 291 | 582 | 367 |

| Plan Year 2022 Monthly MAPD Plan 1 Premium | Post-Medicare MAPD Plan 1 ^{a, b} | | Pre/Post Medicare MAPD Plan 1 ^{a, b} |
|--|--|--------|--|
| | Single | Family | Family |
| Hired on or after July 1, 2010 | \$473 | \$974 | \$1,583 |
| 5 to 9 years service | 431 | 886 | 1,440 |
| 10 to 14 years service | 317 | 640 | 1,083 |
| 15 to 19 years service | 204 | 395 | 727 |
| 20 to 24 years service | 136 | 246 | 512 |
| 25 or more years service | 91 | 150 | 370 |

^a Premium rates are standard rates. Retirees receive a monthly discount of \$25 per tobacco-free covered member. It is assumed that 88% of future retirees and dependents are eligible for the preferred rates.

^b Beginning July 1, 2015, surviving dependents enrolling in the PEIA plan pay premiums based on the years of service earned by the deceased policyholder. Current surviving dependents, and those who enrolled prior to July 1, 2015, are grandfathered under the previous benefit provisions and continue to pay premiums based on 25 or more years of service.

Summary of Principal Plan Provisions

Plan Year 2022 Benefits

SICK LEAVE BENEFITS – HEALTHCARE COVERAGE EXTENSION

The Sick and Annual Leave Program (SAL) allows members hired prior to July 1, 2001, to convert accrued sick leave and accrued annual leave balances at retirement into either retiree healthcare benefits or pension benefits. Members hired before July 1, 1988, may convert accrued sick or leave days into 100% of the required retiree healthcare contribution. Members hired from July 1, 1988, to June 30, 2001, may convert accrued sick or leave days into 50% of the required retiree healthcare contribution. The conversion rate is:

- Two days of unused sick and annual leave days per month of single healthcare coverage; and
- Three days of unused sick and annual leave days per month of family healthcare coverage.

HIGHER EDUCATION FACULTY – HEALTHCARE COVERAGE EXTENSION

Full-time higher education faculty members hired before July 1, 2009, who are employed on an annual contract basis for a period other than 12 months, upon retirement may extend years of teaching service into 100% of the employer-paid healthcare insurance coverage. The conversion rate is:

- 3.3 years of teaching service for one year of single healthcare coverage; and
- 5.0 years of teaching service for one year of family healthcare coverage.

RETIRED EMPLOYEE ASSISTANCE PROGRAM

Under the Retired Employee Assistance Program, the Plan provides premium subsidies to certain retirees if their income falls below 250% of the federal poverty level.

SECTION G

GLOSSARY

Glossary

| | |
|--|---|
| Accrued Service | Service credited under the system that was rendered before the date of the actuarial valuation. |
| Actuarial Accrued Liability (AAL) | The AAL is the difference between the actuarial present value of all benefits and the actuarial value of future normal costs. The definition comes from the fundamental equation of funding which states that the present value of all benefits is the sum of the Actuarial Accrued Liability and the present value of future normal costs. The AAL may also be referred to as "accrued liability" or "actuarial liability." |
| Actuarial Assumptions | These assumptions are estimates of future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income, and compensation increases. Actuarial assumptions are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (compensation increases, payroll growth, inflation, and investment return) consist of an underlying real rate of return plus an assumption for a long-term average rate of inflation. |
| Actuarial Cost Method | A mathematical budgeting procedure for allocating the dollar amount of the actuarial present value of the OPEB trust benefits between future normal cost and actuarial accrued liability. The actuarial cost method may also be referred to as the actuarial funding method. |
| Actuarial Equivalent | A single amount or series of amounts of equal actuarial value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions. |
| Actuarial Gain (Loss) | The difference in liabilities between actual experience and expected experience during the period between two actuarial valuations is the gain (loss) on the accrued liabilities. |
| Actuarial Present Value (APV) | The amount of funds currently required to provide a payment or series of payments in the future. The present value is determined by discounting future payments at predetermined rates of interest and probabilities of payment. |
| Actuarial Valuation | The actuarial valuation report determines, as of the actuarial valuation date, the service cost, total OPEB liability, and related actuarial present value of projected benefit payments for OPEB. |
| Actuarial Valuation Assets | The actuarial valuation assets are the assets used in determining the unfunded liability of the plan. For purposes of GASB Statements No. 74 and 75, the actuarial valuation assets are equal to the market value of assets. |
| Actuarial Valuation Date | The date as of which an actuarial valuation is performed. |
| Actuarially Determined Contribution (ADC) | A calculated contribution into an OPEB plan for the reporting period, most often determined based on the funding policy of the plan. Typically, the Actuarially Determined Contribution has a normal cost payment and an amortization payment. |

Glossary

| | |
|--|---|
| Amortization Method | The method used to determine the periodic amortization payment may be a level dollar amount, or a level percent of pay amount. The period will typically be expressed in years, and the method will either be “open” (meaning, reset each year) or “closed” (the number of years remaining will decline each year). |
| Amortization Payment | The amortization payment is the periodic payment required to pay off an interest-discounted amount with payments of interest and principal. |
| Cost-of-Living Adjustments | Postemployment benefit changes intended to adjust benefit payments for the effects of inflation. |
| Cost-Sharing Multiple-Employer Defined Benefit OPEB Plan (cost-sharing OPEB plan) | A multiple-employer defined benefit OPEB plan in which the OPEB obligations to the employees of more than one employer are pooled and OPEB plan assets can be used to pay the benefits of the employees of any employer that provides benefits through the OPEB plan. |
| Covered-Employee Payroll | The payroll of employees that are provided with benefits through the OPEB plan. |
| Deferred Inflows and Outflows | The deferred inflows and outflows of OPEB resources are amounts used under GASB Statement No. 75 in developing the annual OPEB expense. Deferred inflows and outflows arise with differences between expected and actual experiences; changes of assumptions. The portion of these amounts not included in the OPEB expense should be included in the deferred inflows or outflows of resources. |
| Discount Rate | For GASB purposes, the discount rate is the single rate of return that results in the present value of all projected benefit payments to be equal to the sum of the funded and unfunded projected benefit payments, specifically: <ol style="list-style-type: none">1. The benefit payments to be made while the OPEB plans’ fiduciary net position is projected to be greater than the benefit payments that are projected to be made in the period; and2. The present value of the benefit payments not in (1) above, discounted using the municipal bond rate. |
| Entry Age Actuarial Cost Method (EAN) | The EAN is a cost method for allocating the costs of the plan between the normal cost and the accrued liability. The actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis (either level dollar or level percent of pay) over the earnings or service of the individual between entry age and assumed exit age(s). The portion of the actuarial present value allocated to an actuarial valuation year is the normal cost. The portion of this actuarial present value not provided for at an actuarial valuation date by the actuarial present value of future normal costs is the actuarial accrued liability. The sum of the accrued liability plus the present value of all future normal costs is the present value of all benefits. |
| Fiduciary Net Position | The fiduciary net position is the market value of the assets of the trust dedicated to the defined benefit provisions. |

Glossary

| | |
|--|---|
| GASB | The Governmental Accounting Standards Board is an organization that exists in order to promulgate accounting standards for governmental entities. |
| Long-Term Expected Rate of Return | The long-term rate of return is the expected return to be earned over the entire trust portfolio based on the asset allocation of the portfolio. |
| Money-Weighted Rate of Return | The money-weighted rate of return is a method of calculating the returns that adjusts for the changing amounts actually invested. For purposes of GASB Statement No. 74, the money-weighted rate of return is calculated as the internal rate of return on OPEB plan investments, net of OPEB plan investment expense. |
| Multiple-Employer Defined Benefit OPEB Plan | A multiple-employer plan is a defined benefit OPEB plan that is used to provide OPEB payments to the employees of more than one employer. |
| Municipal Bond Rate | The Municipal Bond Rate is the discount rate to be used for those benefit payments that occur after the assets of the trust have been depleted. |
| Net OPEB Liability (NOL) | The NOL is the liability of employers and non-employer contributing entities to plan members for benefits provided through a defined benefit OPEB plan. |
| Non-Employer Contributing Entities | Non-employer contributing entities are entities that make contributions to an OPEB plan that is used to provide OPEB payments to the employees of other entities. For purposes of the GASB accounting statements, plan members are not considered non-employer contributing entities. |
| Normal Cost | The portion of the actuarial present value allocated to an actuarial valuation year is called the normal cost. For purposes of application to the requirements of this Statement, the term normal cost is the equivalent of service cost. |
| Other Postemployment Benefits (OPEB) | All postemployment benefits other than retirement income (such as death benefits, life insurance, disability, and long-term care) that are provided separately from a pension plan, as well as postemployment healthcare benefits regardless of the manner in which they are provided. Other postemployment benefits do not include termination benefits. |
| Real Rate of Return | The real rate of return is the rate of return on an investment after adjustment to eliminate inflation. |
| Service Cost | The service cost is the portion of the actuarial present value of projected benefit payments that is attributed to an actuarial valuation year. |

Glossary

Total OPEB Expense

The total OPEB expense is the sum of the following items that are recognized at the end of the employer's fiscal year:

1. Service Cost
2. Interest on the Total OPEB Liability
3. Current-Period Benefit Changes
4. Employee Contributions (made negative for addition here)
5. Projected Earnings on Plan Investments (made negative for addition here)
6. OPEB Plan Administrative Expense
7. Other Changes in Plan Fiduciary Net Position
8. Recognition of Outflow (Inflow) of Resources due to Liabilities
9. Recognition of Outflow (Inflow) of Resources due to Assets

Total OPEB Liability (TOL)

The TOL is the portion of the actuarial present value of projected benefit payments that is attributed to past periods of member service.

Unfunded Actuarial Accrued Liability (UAAL)

The UAAL is the difference between actuarial accrued liability and actuarial valuation assets.

¹ Assumes capped employer PAYGO subsidy ends if funded ratio, on a present value of benefits basis, exceeds 105%.

² Assumes \$30 million employer pre-funding contribution ends if funded ratio, on a present value of benefits basis, exceeds 115%.

³ The actuarial valuation assumes 2.5% of eligible waived annuitants under the age of 75 will select retiree healthcare coverage in the future. As of June 30, 2021, there are 13,189 eligible waived annuitants under age 75.
